# ABOUT

Msp Beauty Salon is a full-service beauty salon located in the heart of Pretoria. We are dedicated to provide clients with the best noninvasive aesthetics treatments, excellent service with an enjoyable and safe atmosphere at affordable prices.

## OUR FOCUS

MSP Beauty focusses on providing aesthetic treatment services and products that enhance clients' physical appearance.

We provide laser treatments which are ideal for skin rejuvenation and treatment of skin conditions as well as microblading. Microblading training courses are also available for prospective beauticians to equip them with the theoretical knowledge, microblading kits and practical experience.

## WHAT ARE LASER TREATMENTS

Laser skin treatments introduce short, concentrated, pulsating beams of light directly onto the skin, removing thin layers thereof.

The laser treatments improve the skin's overall tone, pigmentation, texture and laxity by removing impurities such as skin tags, blemishes, acne, tattoos, skin tags, moles, Nevus, Birthmarks, scars, Nevus of Ota, hyper pigmentation as well as reduce sunspots, liver spots, age spots, fines, crows feet, wrinkles and shrinks pores, The treatments allow the treated skin to plump up and appear healthier and younger-looking.

## LASER TREATMENTS

## ACNE AND SCARRING REDUCTION

Acne are red tender bumps with white pus at their tips which are caused by the overproduction of oil and bacteria build up under the skin. The most affected skin are usually on the face, neck, chest, back and shoulders. These areas of the skin have the largest number of functional oil glands.

Acne and acne scarring treatments focus light beams on the top layers of skin to break up scar tissue. This treatment promotes new, healthy skin cells to grow, replacing scar tissue, minimizing pain caused by them as well as reduce the appearance thereof.

## PIGMENTATION TREATMENT

Pigmentation refers to the coloring of your skin produced by Melanin cells. Hyper pigmentation is a condition causing skin to darken. Common skin pigmentation disorders include melasma (chloasma), solar lentigos (sun spots) and freckles. Sun spots are brown spots appearing sun exposed areas of the skin, typically on the hands and face.

### Pigmentation treatment process

A thin layer of gel is applied onto the affected area of the skin and a series of bright laser flashes are moved over the treatment area allowing the dark spots to start fading after a series of sessions.

## SPIDER VEIN REDUCTION

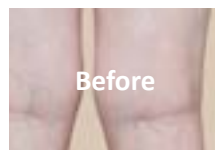

Spider veins are red, blue and purple vessels on the surface of the skin. Spider veins are also closer to the surface of the skin, than varicose veins, spider veins look like tree branches or spider webs with jagged lines, they are commonly found on legs and cover small and large areas of skin. Facial spider veins are mostly caused by hormones, pregnancy, sun exposure, ageing, medical conditions, smoking and alcohol.

Spider vein laser removal therapy is a non-surgical procedure. Local anesthesia is given to numb the affected area of skin, a small incision is made to insert a laser fiber. The fiber emits heat, causing the vein wall to collapse and seal completely. After receiving treatment, a compression stocking is worn and it is advised to prevent sun exposure to the treated area. Within a couple weeks, the spider veins begin to lighten and disappear completely.

# HOLLYWOOD CARBON FACIAL

Hollywood Carbon Laser Facial is very popular among A-list celebrities. It is pain free, noninvasive, has no down-time and is results driven. Carbon laser facials treat a comprehensive selection of conditions, including fine lines, wrinkles, uneven skin tones, uneven pigmentation, shrinks pores and is also effective in treating oily, spot prone skin as it shrinks sebaceous glands, eliminating bacteria responsible for spots.

### Hollywood carbon facial treatment process

Medical-grade liquid carbon is applied to the face and neck. A laser moves over the skin which draws and combust carbon particles on the skin's surface along with excess oil, dead skin cells and bacteria, cleaning the skin intensively. Hollywood Carbon Laser Facials have a skin re-surfacing effect boosting collagen, vaporizing damaged, dull skin cells and encourages new skin cells to grow.

## FIBROBLAST PLASMA SKIN TIGHTENING

The beauty world's #1, advanced, long-lasting, noninvasive, skin lifting, skin tightening and rejuvenating treatment that dramatically enhances looks without the need for costly and invasive surgery. Aging causes the skin's dermal layer to thin and lose laxity gradually, less collagen is produced, causing skin sagging, creases and wrinkles.

The laser treatment converts electrical energy into an electrostatic energy, transmitted as precision plasma flashing pulses without harming surrounding skin tissue. The process generates new skin cells, tightens, lifts and rejuvenates sagging skin, creases and wrinkles. Thin flaky crusts form over the treated area which falls off within days.

## BLEPHAROPLASTY NON-SURGICAL EYE LIFT

Signs of facial ageing are the development of crow's feet and excess skin around the eyes. Eyes are the one of the first areas of the face to show age related changes. The non-surgical Blepharoplasty treatment involves mapping the affected area with dots. A plasma pen moves over the skin tissue inducing direct heat, stimulating instant contractions which tightens skin fibers.

The spots sublimates the superficial corneocytes without affecting the deeper (basal) layers and without causing any bleeding. The treatment does not use a scalpel or laser to remove excess skin, thereby avoiding all risks inherent to the traditional surgical intervention.

Tattoo fading after multiple laser tattoo removal sessions

## LASER TATTOO REMOVAL

**Most tattoos in contain heavy metals which allows the ink to remain on skin permanently. Laser technology can remove most tattoos successfully.**

Laser tattoo removal is a laser treatment that breaks down heavy metal contents in tattoo ink. By breaking down the heavy metal contents, the body is able to dissolve the ink and slowly removes the tattoo over a period of time with repeat laser treatment sessions. The tattoo will fade after each session. Determining factors in the removal of tattoos and treatments sessions are determined by the size of the tattoo, age, type and ink used.

Laser tattoo removal prices range from R250 - R750 per cm<sup>2</sup> treatment session

# PERMANENT EYEBROW TATTOO AND MICROBLADING REMOVAL

Tattoos have heavy metals contents which allow the ink to remain on skin permanently. Laser technology can remove most tattoos successfully.

Laser technology can remove permanent makeup, cosmetic tattoos, eyebrow tattoos and microblading on eyebrows. The laser emits beams of light into the area. This treatment breaks down heavy metal contents in tattoo ink which enables the body to dissolve the ink, slowly removing the eyebrow tattoo/microblading over a period of time with repeat laser treatment sessions. The eyebrow tattoo/microblading will fade after each session. Determining factors in the removal of tattoos and treatments sessions are determined by the size of the tattoo, age, type and ink used.

## LASER REMOVAL

### Laser skin impurities removal

Skin tag removal  
Mole removal  
Birthmark removal  
Nevus and Nevus of Ota removal

Laser removal R500 per session

### SKIN TAG REMOVAL

Skin tags are small projecting skin growths found on the neck, underarms, eyelids, chest, breast and back that cause discomfort. Laser therapy removes skintags completely by creating a microscopic wound that prevents them from growing back.

### MOLE REMOVAL

Moles are skin cells grown clusters. Laser mole removal is a results-driven and quick procedure. A local anaesthetic is administered to the skin, a laser moves over the mole. Light beams are absorbed by the mole, heating it and removes it completely.

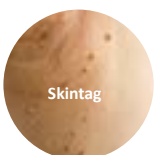

### BIRTHMARK REMOVAL

Birthmarks are abnormalities that are present at birth or develops afterwards. The laser targets the abnormal blood vessels or areas of pigmentation by pulsing light beams over it and breaking them up into small fragments so that they can be disposed of naturally through the body's immune system.

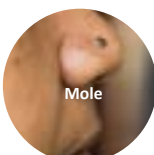

### NEVUS AND NEVUS OF OTA REMOVAL

Nevus are moles of irregular shapes that are brown, pink and bluish that appear on the skin with rough or pebbly textures. Nevus of Ota cause hyper pigmentation of the eye, eyelids, nose, forehead, cheeks and irises. Nevus of Ota is an uncommon pigmentation on the skin arising at birth, childhood or in teen years.

Laser removal of Nevus and Nevus of Ota is the best and effective treatment of hyper pigmentation after repeat treatment sessions. An anesthetic is administered, a laser pulses over the affected area destroying cells that cause the hyper pigmentation. Nevus laser removal treatments will have the mole flake and fall off, removing it completely.

# PERMANENT MAKEUP PROCEDURES

## PERMANENT MAKEUP

MSP Beauty offers permanent makeup that include colour boost, lashes, permanent eyeliner, beauty spot, eye decoration, re-touching and permanent lips.

## MICROBLADING

Microblading is the cosmetic tattooing procedure of semi-permanent eyebrows that involve a hand-held microblade tool with needles that is used to make small incisions on surface of the skin and depositing pigment into it. Microblading eyebrow treatments create fuller and more defined eyebrows and have different pigments for all skin tones.

Expand your services, attend our Microblading courses and obtain a certificate in Microblading.

Our training courses include theory and practical training in microblading. By attending our classes you will learn about legal foundations of microblading, skin anatomy, facial nerves and muscles, pathology, reactions, allergy tests, workplace requirements, skin healing, after care and practicals of how to use microblading tools.

## 2 DAY COURSE R10 000

Includes starter kit

## 5 DAY COURSE R15 000

One-on-one classes, 2 days Theory and 3 days practical

### MICROBLADING KIT INCLUDES

- Dark Brown pigment
- Black pigment
- Tag#45 anesthetic gel
- F&E 30g anesthetic cream
- U needles
- 14'flexi needles
- 5 Eyebrow stickers
- Mineral pencil
- Plastic facemask
- 10 Vit A&D ointments
- Microblading handtool
- Brow measure w tool
- 10 pigment rings

# LIPO LASER SLIMMING

## Cellulite reduction and skin rejuvenation

Low Level Laser Slimming | Endermology | Liposonix

**Non invasive laser treatments target stubborn fatty areas that are resistant to diets and exercise – around the stomach, thighs, buttocks, upper arms, hips and calf muscle area. The treatments improve the appearance of cellulite, tighten and firm skin.**

### Low Level slimming

Low Level Slimming is a painless procedure. A laser pulses light directly onto targeted areas, the body absorbs the light pulses which promotes cell regeneration and breaks down fat cells.

### Endermology laser

Endermology is a massage-based beauty treatment that reduces the appearance of cellulite and uneven skin tone. Deep tissue mobilization targets dormant fatty cells with patented rollers and pulsation technologies. The treatment improves circulation and increases skin elasticity.

### Liposonix

High-intensity, focused ultrasonic waves treat stubborn fatty areas by emitting energy. The structure of fatty cells beneath the surface of the skin are broken down which enables the body to discard of the accumulated fatty cells and toxins, naturally.

R500 - R1 250 per session

## LASER RADIO FREQUENCY **ANTI AGING TREATMENTS**

Radio frequency laser treatments stimulate protein fibres within the skin, promotes the natural production of elastin and collagen to combat the signs of aging, sagging skin, fine lines and wrinkles of the face and neck.

### **LASER RADIO FREQUENCY ANTI AGING**

Energy waves emitted by laser, heat the dermis of facial tissue. The heat generated promotes the production of collagen which reduces the appearance of fine lines, wrinkles and firms the skin evenly.

### **LASER RADIO FREQUENCY SKIN TIGHTENING**

Laser Radio frequency treats sagging skin of the face, neck, stomach, thighs and arms. Dermal layers are heated by laser to stimulate the production of elastin and collagen, plumping up the skin. The treatment will also improve the tone, firmness and texture of the skin.

R500 - R1 250 per session

## LASER RADIO FREQUENCY **VAGINAL REJUVENATION** Vaginal skin tightening

**With aging, giving birth and estrogen level fluctuations, the vagina's surrounding skin loses firmness, causing skin sagging and may also cause discomfort.**

By stimulating the vaginal tissue with a radio frequency laser, the production of elastin and collagen is given a boost.

The Laser Radio frequency procedure is painless, a laser passes over the labial skin of the vagina. The treatment emits energy to penetrate the skin's deeper layers which promotes the production of elastin and collagen. Fractional tightening occurs when new elastin and collagen is naturally produced by the body, the skin tightens, reducing the labia's size and firmness of the skin.

R500 - R1 250 per session

## COLLAGEN THERAPY **MICRONEEDLING**

Microneedling is a collagen therapy treatment that creates tiny needle perforations with a derma roller or derma pen on the skin. The process triggers the skin's natural regeneration process to boost collagen and elastin production.

Microneedling tightens the skin, reduces fine lines, improves tone, texture, age spots and sun damage, reduces acne scarring and makes the skin appear more youthful.

**R550 for 1 session**  
**30 - 45minute session**

## DERMAPLANNING AND COMBOS

Dermaplaning is a cosmetic procedure that removes the top layers of your skin to remove fine wrinkles and deep acne scarring.

Results of having the procedure done is more youthful, bright and smooth skin.

Dermaplaning smoothes the skin's surface and is safe with little risks of side effects. The procedure does not require any downtime for recovery which makes it very effective and convenient.

## SLIMMING INJECTIONS

# LYPOSIS

Lyposis slimming injections are a cosmetic procedure. Lyposis slimming therapy are injections that are used to dissolve fat. It is a non-surgical procedure, it is the most effective method of dissolving fat in targeted areas. Ingredients include vitamin B-12, B-6, vitamin B complex, branched chain amino acids, L-carnitine, phentermine and a combination of methionine, inositol and choline.

Lyposis injections target specific deeper layers of the skin, it also improves the surface of the skin by dissolving small to medium unwanted localized areas of stubborn fat that normal diet and exercise does not eliminate.

## SLIMMING SESSIONS

20 Lipo slimming injections R900

50 Lipo slimming injections R1 400

40 Lipo slimming injections R1 200

60 Lipo slimming injections R1 700

**Liposis Slimming Injections break down fat in the chin, thighs, knees and abdomen.**

## INTIMATE WAXING

We offer a wide variety of waxing for him and her, using pot waxing techniques to remove even the most stubborn of hair.

By waxing you'll experience less regrowth between appointments, the hair grows back progressively finer and sparser, the skin gets gentle exfoliation which makes the areas less prone to inflammation with less itching and prickliness.

## EQUIPMENT **PROLASER**

Prolaser machines are also available for purchase. Training is also provided at R20 000 per machine.

**CRFD - R170 000** | Fat, cellulite, wrinkle reduction. Skin tightening including labia majora.

**IPLD - R230 000** | Hair removal, skinrejuvination and scar reduction, reduction of acne, pigmantation, and spider veins.

**HIFU - R230 000** | 2-in-1 workstation. Skin and vaginal tighteningand vitality, non-surgical reduction and body contouring.

**ND YAG - R130 000** | Q-switch ND YAG laser. Tattoo removal, skin rejuvination including carbon laser facial, reduction of spider veins, pigmentation, acne and scaring.

**Plasma pen - R34 000** | Fibroblast plasma pen. Reduce superficial pigmentation, spider veins, improve sagging on upper eyelids, skin tightening, removal of skin tags, removal of superficial non-professional tattoos and permanent make-up.

**LLLT - R200 000** | Hair- regrowth station

**Needles Mesogun - R60 000** | Mesotherapy injector with LED, including 50 needles and one hyaluronic acid serum.

**Coolift - R90 000** | Instant wrinkle reduction reduction CO2Gun including 25 cartridges.

**BB+ - R90 000** | Breast and bum vacuum agmentation machine including 26 cups.

**EMS - R230 000** | High-intensity electromagnetic muscle toner and fat burner including 4 handles and pervic cushion for kegal exercises.

**Shockwave - R110 000** | Erectile vitality and deep tissue shockwave workstation.

**LED - R34 000** | Skin rejuvination, wrinkle, acne and scarring,, pigmentation and spider vein reduction.

**Iontophoresis - R100 000** | Electro antipersperant treatment to reduce excessive sweating.

**TMA - R200 000** | Thermo mechanical abiation, also known as Tixel. Wrinkle reduction, skin tightening, including sagging skin on the upper eyelids.
